Dear Messrs. Walker and Dodaro,

Enclosed, for your information, are documents supporting my concerns over your combined eleven years of written Congressional testimony stating that, "significant progress has been made in improving federal financial management." I find these statements to be contrary to both your supporting testimony and my twenty-plus years of involvement in this government's failed outsourcing of its accounting and financial software standards to AICPA firms, financial software companies, and management consulting firms. Add the lack of qualified six-figure salaried financial managers, a top down and repressive government management style, Congress's failure to pass real whistleblower protection or penalties for self-serving political appointees; you now have all the ingredients for a corrupt and corporate driven government such as the federal government.

The enclosed documents support my concerns of a distortion of facts, at all government levels, the elimination of the checks and balances to address these most basic accounting and financial system deficiencies, and the need for "change" to address the gross waste of our tax dollars and internal threats that imperil the financial security of this great Country.

If either of you have any questions regarding the attached documentation, please feel free to contact me at your leisure.
